## PROJECTS

- **Hotel Room Booking App**

<https://anointedosara-hotel-room-booking.netlify.app>

A project I came across in a friend's portfolio. Creating this project I made use of a dynamic page and dommy data calls. This project was also created using the power of Reactjs.

- **React Movie App**

A personal project also based on a design I saw online. This app gives you link to the trailer of trending movies and tv-series on youtube. It was created using Reactjs and RestfulApi.

- **E-commerce Product page**

<https://anointedosara.github.io/ecommerce-product-page>

A very responsive project based on a design I got on Frontend Mentor. It was created using raw Html, Css and JavaScript and no frameworks.

- **Calculator App**

<https://anointedosara.github.io/calculator-app>

Also a very responsive project based on a design I got on Frontend Mentor. It was created using raw Html, Css and JavaScript and no frameworks.

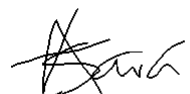

- **Rest Countries Api**

<https://anointedosara.github.io/rest-countries-api>

Based off on a challenge on Front-End Mentors. I finished the project which I employed my knowledge of RESTFul APIs and made several get requests to the countries RESTFul api and populated the page with the data gotten from it.
