PROFILE

I am a Software Engineer (Frontend Developer) seeking employment with a fast-growing startup. I bring sound knowledge and experience in building modern, scalable, interactive and very responsive web applications using React and Next.js. I seek challenging opportunities where I can grow and at the same time achieve organizational goals and more.

EDUCATION

B.Sc Geomatics
University of Benin

2020 – 2025

SKILLS

- Reactjs
- Nextjs
- Restful APIs
- Styled Components
- HTML and CSS
- Vanilla JavaScript

EXPERIENCE

Frontend Developer
Cloudolle

07/2023 – 01/2024
United Kingdom

- Developed and optimized the company's landing pages using Next.js (React framework) and Styled Components, ensuring modern, responsive, and accessible user interfaces.
- Collaborated with designers to translate Figma wireframes into clean, reusable React components with consistent design systems.
- Improved page performance and SEO by implementing server-side rendering (SSR) and dynamic routing in Next.js.

Frontend Developer Intern
Zuri Team

08/2022 – 11/2022
Lagos, Nigeria

- I was involved in a rigorous and fast paced Zuri internship till the last stage.
- I built several Front End projects.
- Collaborated with a team of skilled developers and designers to build a responsive web applications and complete tasks.
- I learnt alot.

PROJECTS

Hotel Room Booking App 🔗

- I built a responsive hotel booking application using Reactjs, allowing users to browse, search, filter, and reserve rooms based on availability, dates, and amenities.

- Integrated a RESTful API to dynamically fetch room data and manage real-time availability and pricing, enhancing user experience with up-to-date information.
- Created reusable, styled UI components using Styled Components, ensuring a consistent design system across pages and device sizes.
- Prioritized mobile-first design, delivering a seamless booking experience across desktop and mobile devices.
- Deployed the application on Netlify, making the project accessible via a live link for portfolio review.

React Movie App [🔗](#)

- I developed a responsive movie discovery application using Reactjs, enabling users to search for films, view details (synopsis, ratings, cast), and browse popular or trending titles.
- Integrated with a public movie API to fetch real-time data for movies, including images, descriptions, and metadata.
- Built modular UI components and managed state effectively to deliver a smooth, performant user experience.
- Styled the interface with Styled Components, ensuring a clean design and consistent theme across screens.
- Focused on mobile-first design to make the app usable and visually appealing on both mobile and desktop.

E-commerce Product page [🔗](#)

- This is a responsive product page for an e-commerce site using React (Vanilla JS / HTML / CSS), focusing on a clean and modern UI.
- Implemented interactive product features: image carousel, size or variant selection, quantity adjustment, and “add to cart” functionality.
- Managed state to display dynamic product information, such as price, description, and availability.
- Ensured the interface is responsive, optimizing layout and usability for desktop, tablet, and mobile views.
- Deployed to GitHub Pages, providing a live, shareable demo.
